

# Infeed Conveyor

The Barclay Roto-Shred Infeed Conveyor is engineered to optimize material handling for shredding operations. Designed for efficiency and durability, this conveyor seamlessly integrates with the Barclay shredder lines to deliver unmatched performance in feeding materials to shredding systems.

The Barclay Infeed Conveyor ensures smooth, consistent operation, reducing downtime and maximizing productivity. Barclay Roto-Shred has been a trusted name in the shredding industry for years, providing innovative, reliable, and high-quality material handling solutions. The Infeed Conveyor reflects our commitment to delivering products that exceed expectations in performance, durability, and safety.

Optimize your shredding operation today with the Barclay Roto-Shred Infeed Conveyor!

## Specifications and Features

- Heavy-Duty Construction:** Built with reinforced steel for durability and long service life, even in demanding environments.
- Custom Configurations:** Available in various lengths, widths, and belt types to suit your specific shredding needs.
- Drive System:** Equipped with a 2HP gear motor with optional Variable Frequency Drive (VFD) for precise material flow.
- Seamless Integration:** Designed to work flawlessly with Barclay Roto-Shred systems and other OEM equipment.
- Safety Features:** Includes emergency stop controls and safety guards to ensure operator safety.
- Low Maintenance Design:** Features self-cleaning mechanisms and easily accessible components for reduced maintenance time.
- Applications:** Ideal for tire recycling facilities, scrap processing operations or any material handling requiring consistent feed rates.
- Benefits:** Enhanced efficiency and cost savings with a durable design and flexible, scalable configurations to suit operations of any size.
